

Enhance Airport Security with Crowd-Sourced Incident Reporting

HOW?

- Airport employees, vendors and the general public use ELERTS mobile app to report safety issues to security
- Reports are sent in less than 20 seconds
- ELERTS app enables 2-way communication between reporter and security
- Passengers and employees report what they see and hear in real-time to security
- Report includes description of incident with photos or video
- GPS location identified with incoming incident report so police know where situation is happening
- Increase security and safety without additional staffing
- Cloud based, no maintenance required
- Supports iPhone and Android phones

In a crisis situation, there is no better tool to provide instant information to help quickly resolve an issue
