

## Medical Facilities Are Mobilizing Their Security Efforts

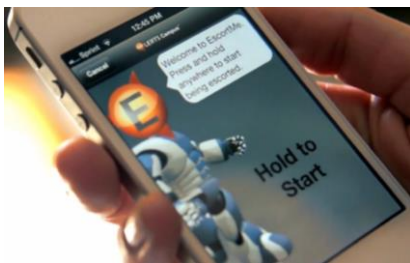

### Report Security Concerns Instantly

- Staff use app to report safety & security concerns
- Real-time 2-way communication with security
- Staff report what they see & hear:
  - Incident description, report type, photo/video
- GPS map shows incident location
- Security broadcast emergency alerts to individuals or groups
- Includes Check-In for personal safety status
- Web-based console, no hardware required
- Supports iPhone and Android phones
- NIMS Compliant

### Report a hazard. Document a practice.

- Hospital Facilities Managers can also use ELERTS See Say to comply with Environment of Care, Emergency Management, and Life Safety mandates by using their smartphones to:
  - Document Joint Commission issues
  - Test emergency communication
  - Add a mobile layer to safety protocol

### ELERTS EscortMe

#### Virtual Security Escort

Security is alerted by your smartphone and its GPS, to know when and where you need help.

***In a crisis situation, there is no better tool to provide instant information to help quickly report an issue***
