

EVENT ALERT by ELERTS™

and Software House C•CURE 9000

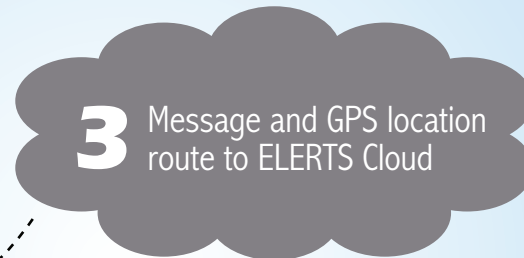

Enable facility personnel to share security concerns and, if serious, LOCKDOWN their facility in seconds

1 A threat is seen

2 Message is sent by tapping "Lockdown" and confirming

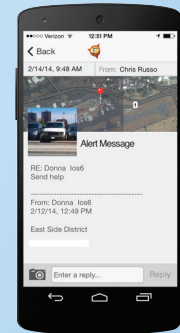

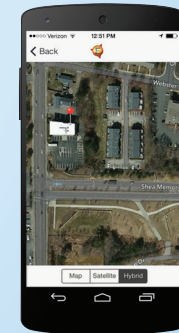

3 Message and GPS location route to ELERTS Cloud

4 "Lockdown" command is sent to C•Cure 9000 to lock doors

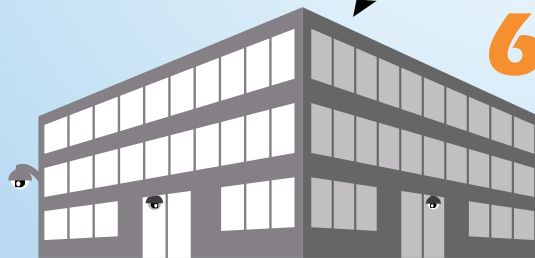

5 "Lockdown" is broadcast to personnel and others using EVENT ALERT app

6 First Responders see the message and map on their smartphones

7 Informed personnel can better respond to the security threat

Optionally integrates with Access Control and surveillance camera systems
