

EVENT ALERT by ELERTS™

With Access Control integration

Enable facility staff to share security concerns with colleagues and First Responders.

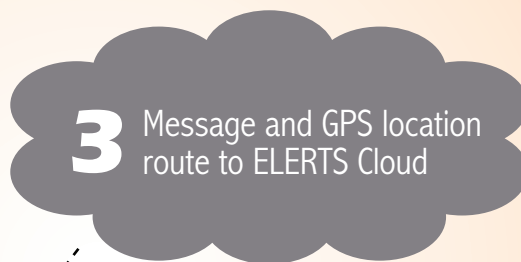

1 A threat is seen

2

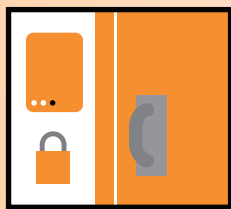

Message is sent by tapping ALERT button

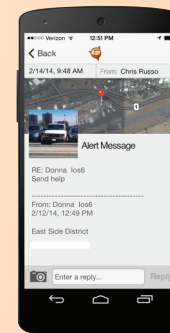

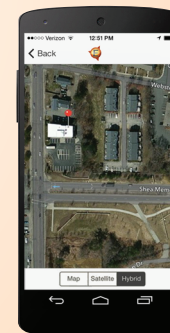

3 Message and GPS location route to ELERTS Cloud

4 ALERT is broadcast to personnel and others using EVENT ALERT app and to Access Control system

5 Electric locks are triggered. (Automatic door locks still allow exit.)

6 First Responders see the message and map on their smartphones

7 Informed personnel can better respond to the security threat.
