

## Enhance Safety & Security at Government Facilities

ELERTS See Say Solution provides government facilities immediate situation awareness of everyday incidents and more concerning security issues, delivering a highly-valued additional layer of protection. Allow staff and citizens to provide early warnings for authorities, using their ever-present mobile phones.

### FEATURES

- Staff use app to report safety & security concerns
- Reports include; incident description, report type, photo/video and GPS location
- Reporting enables real-time 2-way communication
- Broadcast alerts to staff
- Alert with Panic Button from desktops
- Web-based console, no hardware required
- Supports iPhone and Android phones

### NIMS COMPLIANT

NIMS (National Incident Management System) is an important emergency standard and proven compliance is a key advantage for ELERTS. FEMA tested and rated ELERTS compliant with NIMS emergency protocol standards.

Protect facilities and infrastructure with swift alerts from people on the street. Safe-guard a wide variety of buildings, such as Courthouses, Unemployment Offices, Port Authorities, Tax Offices, Municipalities, Regional Intelligence Centers, Government Benefit Offices, DOT, Water or Electric Plants, Airports and more.

***Protect workers from external and internal threats, vulnerable areas are safer with mobile reporting.***
