

Medical Facilities Are Mobilizing Their Security Efforts

Report Security Concerns Instantly

- Staff use app to report safety & security concerns
- Real-time 2-way communication with security
- Staff report what they see & hear:
 - Incident description, report type, photo/video
- GPS map shows incident location
- Security broadcast emergency alerts to individuals or groups
- Web-based console, no hardware required
- Supports iPhone and Android phones
- FEMA, NIMS Compliant
- Report a hazard. Document a practice.
- Hospital Facilities Managers can also use ELERTS See Say Now to comply with Environment of Care, Emergency Management, and Life Safety mandates by using their smartphones to:
 - Document Joint Commission issues
 - Test emergency communication
 - Add a mobile layer to safety protocol

Panic Button

App users can hold the button for 3 seconds and transmit a panic report to their organization's security center.

In a crisis situation, there is no better tool to provide instant information to help quickly report an issue
